

REMARKS

Status of the Claims

Claims 1-20 were pending.

Claims 2-17 and 19-20 have been canceled.

Claims 1 and 18 were amended and remain pending.

Reconsideration is respectfully requested.

Amendments to the Claims

Claims 1 and 18 were amended to teach the subject matter elected pursuant to the Restriction Requirement.

Claims 2-17 and 19-20 were canceled as being drawn to non-elected subject matter.

Applicants believe that the present amendments do not introduce new matter, are fully supported by the specification and priority document, and do not broaden the scope of the claims.

Election/Restrictions

The Examiner has stated that claims 1-20 are drawn to products of the Formula depicted in claim 1, classified in various subclasses of classes 514, 544, 546 and 548. It is alleged that under 35 U.S.C. §121, an election of a single compound is required, including an exact definition of each substitution on the base molecule (Formula (I)), wherein a single member at each substituent group or moiety is selected. Applicants traverse this rejection because numerous examples disclosed in the instant specification support the teaching of the numerous groups in the claims. But, applicants will proceed to elect a single compound in order to advance this case to prosecution. Hence, claim 1 has been amended to teach a single elected compound of Formula I. Claim 18 has been amended to depend from claim 1 and is within the elected group.

Applicants reserve the right to file divisional applications covering the compounds of the non-elected subject matter.
